

Trees Available through Residential Re-Leaf

ST. JOHN'S

CONIFEROUS TREES

Species: Austrian Pine
Mature Height: 15 m
Mature Spread: 6 m
Shade Tolerant: no
Salt Tolerant: yes
Habitat: adaptive to many sites
Notes: very tolerant of urban conditions

Species: Balsam Fir
Mature Height: 12 m
Mature Spread: 4 m
Shade Tolerant: yes
Salt Tolerant: no
Habitat: adaptive to many sites
Notes: cones stand straight in contrast to other conifers

Species: Colorado Spruce
Mature Height: 12 m
Mature Spread: 4 m
Shade Tolerant: moderately
Salt Tolerant: moderately
Habitat: adaptive to many sites
Notes: some varieties have bluish needles

Species: Larch
Mature Height: 12 m
Mature Spread: 4 m
Shade Tolerant: no
Salt Tolerant: no
Habitat: moist, well-drained sites
Notes: yellow fall colour, loses needles in winter

Species: Norway Spruce
Mature Height: 15 m
Mature Spread: 4 m
Shade Tolerant: moderately
Salt Tolerant: no
Habitat: adaptive to many sites
Notes: produces large cones, 10-18 cm long

Species: Red Pine
Mature Height: 15 m
Mature Spread: 6 m
Shade Tolerant: no
Salt Tolerant: no
Habitat: well-drained sites
Notes: great for blocking wind and snow

Species: Colorado Spruce
Mature Height: 12 m
Mature Spread: 4 m
Shade Tolerant: moderately
Salt Tolerant: moderately
Habitat: adaptive to many sites
Notes: some varieties have bluish needles

Species: Scots Pine
Mature Height: 12 m
Mature Spread: 10 m
Shade Tolerant: no
Salt Tolerant: yes
Habitat: adaptive to many sites
Notes: one of the first trees introduced to North America

Species: Weeping Nootka Cypress
Mature Height: 25 m
Mature Spread: 4 m
Shade Tolerant: yes
Salt Tolerant: no
Habitat: moist sites
Notes: interesting form with drooping branches

Species: White Spruce
Mature Height: 12 m
Mature Spread: 4 m
Shade Tolerant: yes
Salt Tolerant: no
Habitat: adaptive to many sites
Notes: native to every Canadian Province and Territory

DECIDUOUS TREES

Species: Apple
Mature Height: varies
Mature Spread: varies
Shade Tolerant: yes
Salt Tolerant: moderately
Habitat: adaptive to many sites
Notes: produces white, pink or red flowers in spring

Species: Beech
Mature Height: 15 m
Mature Spread: 10 m
Shade Tolerant: yes
Salt Tolerant: no
Habitat: moist, well-drained sites
Notes: some varieties have maroon leaves

Species: Birch
Mature Height: 15 m
Mature Spread: 7 m
Shade Tolerant: no
Salt Tolerant: moderately
Habitat: varies by species
Notes: yellow fall colour, white papery, peeling bark

Species: Cherry
Mature Height: varies
Mature Spread: varies
Shade Tolerant: no
Salt Tolerant: no
Habitat: varies by species
Notes: produces white or pink flowers

Species: Hackberry
Mature Height: 12 m
Mature Spread: 10 m
Shade Tolerant: moderately
Salt Tolerant: no
Habitat: adaptive to many sites
Notes: yellow fall colour, food source for wildlife

Species: Lilac
Mature Height: 2.5 m
Mature Spread: 2 m
Shade Tolerant: no
Salt Tolerant: yes
Habitat: adaptive to many sites
Notes: produces white or pink flowers in spring

Species: Linden
Mature Height: 35 m
Mature Spread: varies
Shade Tolerant: yes
Salt Tolerant: yes
Habitat: adaptive to many sites
Notes: produces small fragrant flowers in spring

Species: Maple
Mature Height: varies
Mature Spread: varies
Shade Tolerant: varies
Salt Tolerant: varies
Habitat: varies on species
Notes: yellow, red and orange fall colours

Species: Mountain Ash
Mature Height: 4.5 m
Mature Spread: 3 m
Shade Tolerant: moderately
Salt Tolerant: yes
Habitat: adaptive to many sites
Notes: produces cluster of shiny red-orange berries

Species: Oak
Mature Height: 30 m
Mature Spread: varies
Shade Tolerant: no
Salt Tolerant: yes
Habitat: adaptive to many sites
Notes: columnar or fastigiate varieties available

Species: Serviceberry
Mature Height: 7 m
Mature Spread: 5 m
Shade Tolerant: moderately
Salt Tolerant: yes
Habitat: adaptive to many sites
Notes: produces white, showy flowers in spring
