

BUDGET 2013

PROGRESSIVE CITY, PRUDENT CHOICES

- Three-Year Forecast
- Infrastructure Plan
- Assessment Impact
- 2013 Tax Rates

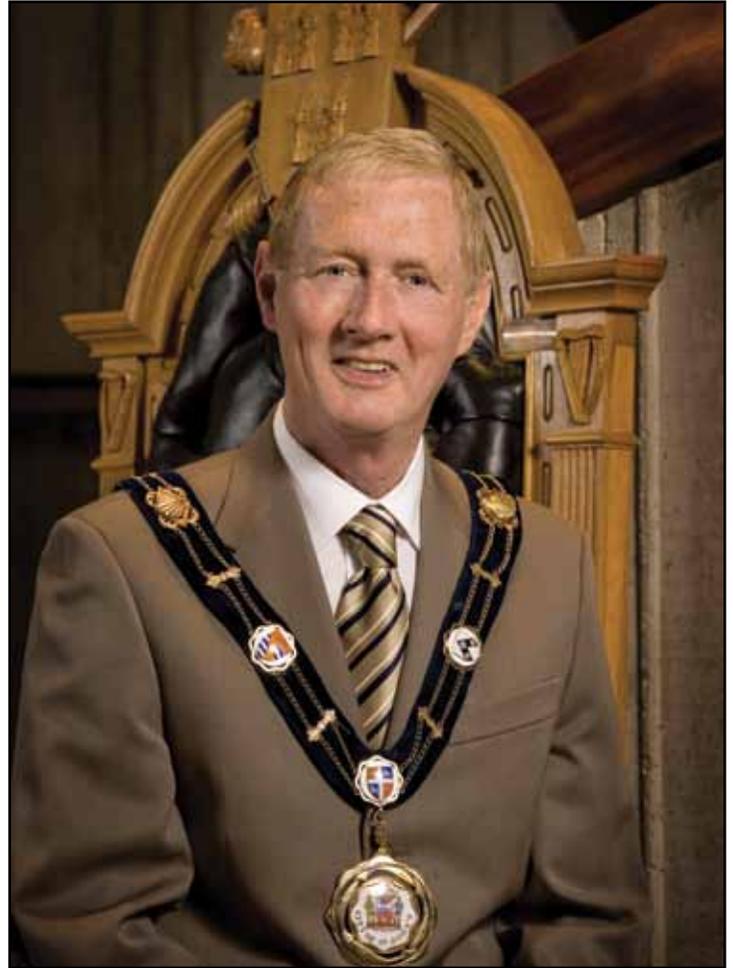

ST. JOHN'S

MESSAGE FROM THE MAYOR

You only have to take a short drive through our City's historic downtown to see the impact of our strong economy as construction cranes dot the horizon on a daily basis.

The unprecedented economic growth we have seen in recent years will continue into the foreseeable future. However, with growth comes increased pressures to provide first class services and infrastructure to residents and businesses.

Our 2013 budget which you are about to read represents far more than a simple year's work. This is the first time we have ever delivered a three-year forecast and I have no doubt that this new three-year budget cycle will allow us to better manage our fiscal resources and ultimately provide our residents and businesses with better services and infrastructure.

I would like to take this opportunity to thank City Council and staff for all of their efforts to ensure we are able to deliver a 2013 budget that not only paints a vision of our City for the next three years, but also uses prudent fiscal practices to manage growth, provide a high level of service to our residents and focus on the key issues facing our growing City.

Sincerely,

A handwritten signature in cursive script that reads "Dennis O'Keefe".

Dennis O'Keefe
Mayor, City of St. John's

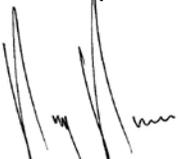

MESSAGE FROM THE FINANCE CHAIR

This year was a challenging budget process for the City of St. John's in many ways. Not only is it the first year of a new assessment cycle, but we have also taken a progressive step forward towards a three-year budget cycle that will allow us to more accurately budget to achieve our long-term goals as a municipality.

We are also blending the Business Occupancy Tax into the Business Realty Tax to form one tax for commercial properties in 2013. This has been 20 years in the making and we are pleased to have worked with the business community throughout this process to achieve this long-desired goal.

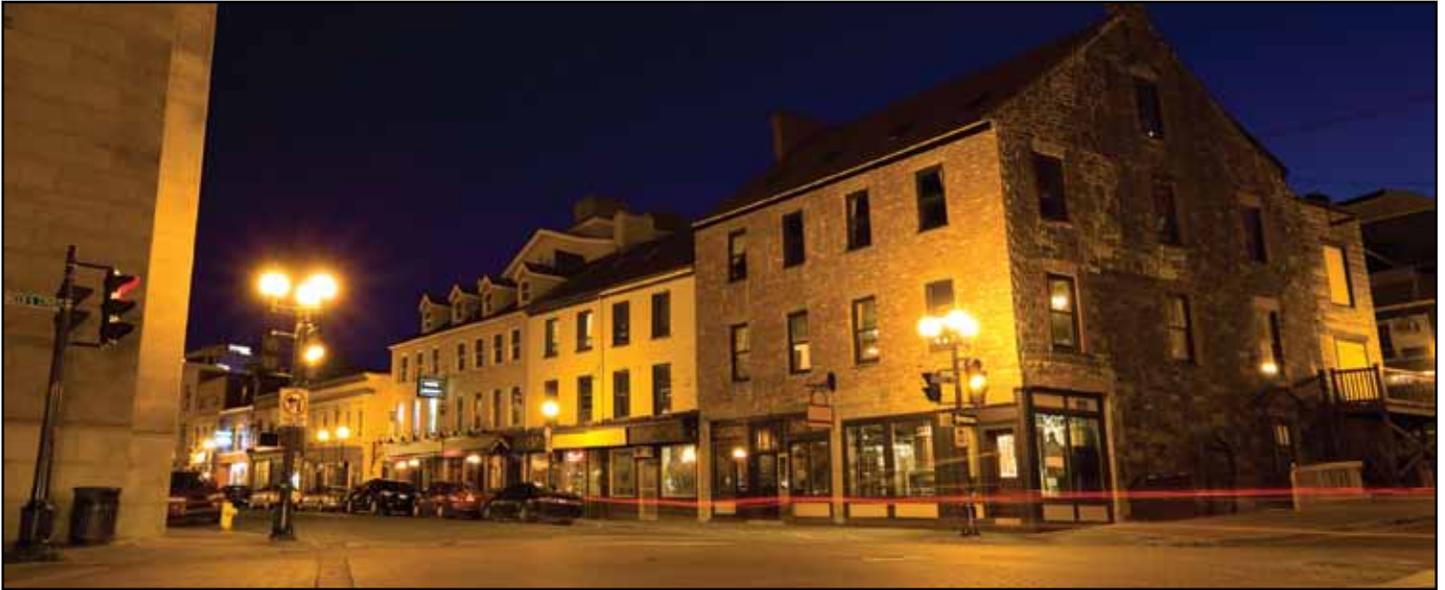

Finally, what has made this process particularly challenging this year was our goal to limit expenditure growth, while tackling our unfunded pension liability. The global economic recession has impacted pension funds across the world and the City of St. John's is no different. We are very pleased we have been able to limit our expenditure growth to under four per cent, while at the same time addressing some of the key issues facing our City.

Sincerely,

Danny Breen
Chair, Finance and Administration Standing Committee
City of St. John's

INTRODUCTION

Our City is growing and changing at a rapid rate as economic growth spurs development across our City. As the capital city of Newfoundland and Labrador we must also grow and change as we develop new operating practices that allow us to meet the growing needs of our City.

The 2013 budget is reflective of our desire to develop a progressive and strategic long-term budgeting strategy. This year's budget is different in several respects.

In addition to the 2013 budget, we will also present an expenditure and revenue forecast for 2014 and 2015. This is the first step towards a three-year budget cycle intended to promote long-term planning and multi-year business plans in City departments.

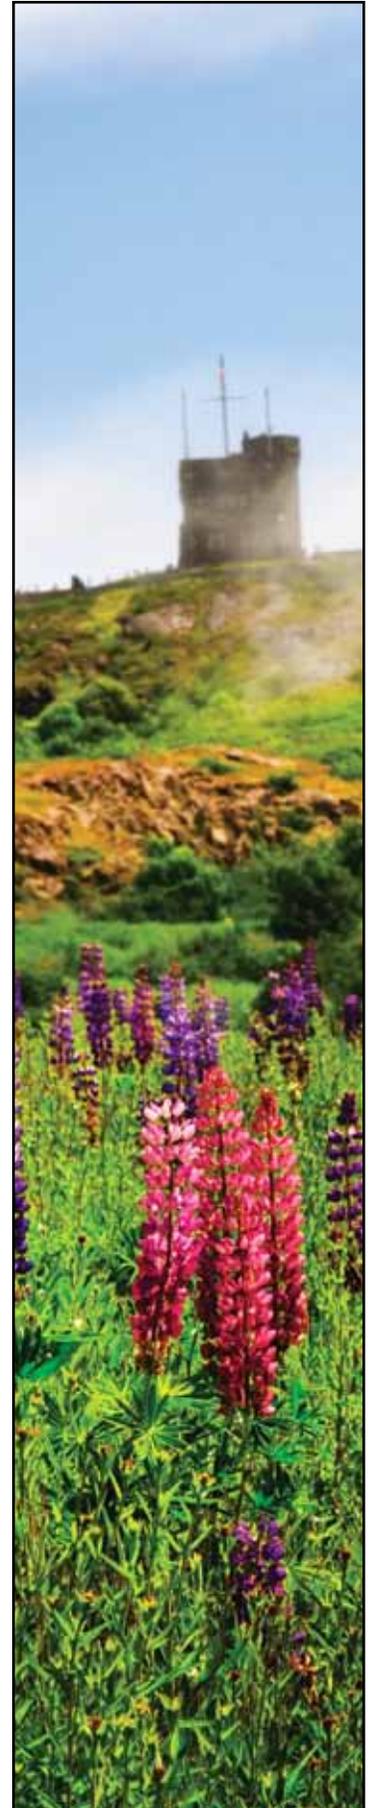

This first step towards a three-year budget process coincides with the start of a new property assessment cycle which comes into effect on January 1, 2013 and also operates on a three-year cycle. The increase in economic activity in the City has driven population and business growth and in turn the demand for residential and commercial properties.

This demand has led to significant increases in property values, which are reflected in the 2013 property assessments. Residential properties, including residential vacant land, increased by an average of 47 per cent. Commercial property values, including commercial vacant land, increased by an average of 31 per cent. These large increases in property values within the City necessitated a re-examination of current residential and commercial tax rates during the budget process.

Another significant change for the 2013 budget is that the City will blend the Business Occupancy Tax into the Business Realty Tax. This will create a single flat rate tax applicable to all commercial properties and restore equity to the business tax system. This upgrade of our business tax system has been 20 years in the making for the City of St. John's and we are grateful for the support of the business community, particularly the Tax Blending Steering Committee, throughout this process.

We also broadened our pre-budget consultation process for 2013. We held two focused public consultation sessions, including one session where organizations and individuals could give presentations to the City and another round table forum with an independent facilitator. In addition to these public sessions, we also used social media to engage the public.

These public engagement sessions are important ways for the City to gain a better understanding of the priorities residents want us to work on during the budget process. As an example, this year we were approached by St. John's Minor Baseball who advocated for increased funding for community sport organizations. As a result we have added an additional \$100,000 in funding to support volunteer organizations.

Volunteers are the heart and soul of the City and we need to do what we can to support their efforts to provide quality of life opportunities to our residents.

We are listening and we will work towards further strengthening the consultation process for future budgets.

While there are many changes to the 2013 budget process, what hasn't changed is Council's commitment to fiscal discipline and prudent expenditure management.

The City continues to enjoy robust economic growth. The property reassessment process gives us a clear indication of the direct impact economic growth has on the City's revenue position. Between 2009 and 2012, the number of residential and commercial properties increased by approximately 1,900 units, representing a 5.2 per cent expansion of the tax base. That equates to approximately 1.7 per cent growth per year.

It is forecasted that the City's property tax revenue will continue to grow at a rate of 1.7 per cent per year, as long as the current level of residential/commercial development is sustained. It is important to highlight that:

- 1.7 per cent growth in property tax revenue is certainly lower than many would expect in today's booming economy. But, the City does not benefit directly from higher incomes, increased retail sales, higher gas prices, etc. Under the current Provincial-Municipal Fiscal Relationship, our over-reliance on property tax limits the direct benefit the City receives from economic growth to a fraction of what is received by the provincial government.
- What is also clear is that annual 1.7 per cent growth in property tax revenue is not sufficient to sustain the increasing cost of servicing a growing city like St. John's.

2012 BUDGET UPDATE

Gross expenditures for 2012 are currently forecast to be under budget by about \$1.5 million, representing a variance of less than one per cent on a \$235 million budget. The forecasted saving of \$1.5 million could disappear very quickly with a few early winter storms.

City tax revenue is projected at \$179.8 million for 2012, compared to an original budget of \$177.9 million, a positive variance of just over one per cent. Construction permit revenue is up significantly from \$3.4 million to \$4.2 million, as evidenced by the number of large buildings now under construction. Total revenue from all sources is actually up by approximately \$6 million, but includes some non-recurring items such as recovery of Hurricane Igor damage costs at \$1 million. Also included is a \$1.5 million increase in tipping fee revenue at Robin Hood Bay Waste Management Facility, which is not available to the City to fund any other program expenses, as the facility is a regional operation. The City currently projects a surplus for 2012 in the range of \$5 to \$7 million. Of this amount, there is about \$3 million we can reasonably expect to re-occur in future years and this has been factored into our 2013 to 2015 projections. Once the 2012 financial statements are completed the City will consider the options for use of the surplus.

EXPENDITURE: BUDGET AND FORECAST

For 2013 the City has worked hard to ensure that our expenditures are kept to a reasonable level of growth. City expenditures are budgeted at \$244.6 million. This represents a prudent 3.8 per cent increase over 2012 budget levels and re-affirms this Council's commitment to fiscal discipline.

At this level of expenditure, there will be no reduction in service levels to the public, but discretionary expenditures will be tightly managed.

Water/Wastewater Treatment

Water and wastewater treatment costs continue to escalate. The City continues to work to increase both the quantity and quality of water, and we remain committed to the Harbour clean-up.

- The Riverhead Wastewater Treatment Plant is scheduled to be fully operational by July, 2013. Wastewater System Effluent Regulations announced by the federal government this year will require the City and its regional partners to complete future upgrades to secondary processing, which will cost the City and region an estimated \$135 million based on 2012 construction costs. In announcing the new regulations the federal government did not announce any funding programs to assist municipalities in making the necessary upgrades, which the Federation of Canadian Municipalities estimates at \$20 to \$40 billion nationwide.

EXPENDITURE: BUDGET AND FORECAST

- The new Bay Bulls Big Pond Dissolved Air Flotation (DAF) Treatment System should be operational by July, 2013. This system will provide water users of the Regional Water System in St. John's, Mount Pearl, Paradise, Conception Bay South and Portugal Cove-St. Philips with enhanced water quality.
- The new Petty Harbour-Long Pond Treatment Plant is expected to be operational by November, 2013. The significance of this project cannot be understated. This \$50 million project was undertaken by the City of St. John's, with the financial support of the federal and provincial governments. It will increase the supply of water by approximately 15,000 cubic meters per day. While it may be a City of St. John's funded project, the communities of Mount Pearl, Conception Bay South, Paradise and Portugal Cove – St. Philips will also benefit economically. When Petty Harbour-Long Pond comes on stream, St. John's will reduce its draw on Bay Bulls Big Pond, essentially making more water available to the other communities which rely on this source.

Water/Wastewater Treatment Costs (millions of dollars)

	2012 Budget	2013 Budget	2014 Forecast	2015 Forecast
Water	\$25.3	\$26.9	\$30.4	\$30.8
Wastewater	\$9.9	\$9.8	\$11.7	\$11.8
Total	\$35.2	\$36.7	\$42.1	\$42.6

The budget and forecast numbers are reflective of the new treatment plants becoming fully operational, as well as the City beginning to repay the principle and interest on the funding for these projects.

EXPENDITURE: BUDGET AND FORECAST

Subsidies

St. John's Sports & Entertainment Ltd. operates Mile One Centre and the St. John's Convention Centre on behalf of the City and has made great strides forward in recent years. Over the past five years the corporation has successfully reduced its operating losses to the point where it's subsidy was half of it's 2008 value of \$2 million. In 2013 the subsidy will be reduced yet again to \$750,000 down from \$1 million in 2012.

The City also provides a subsidy to Metrobus Transit which will increase from \$10.5 million in 2012 to \$11.1 million for 2013. Metrobus will also be moving into its new depot in 2013, which was built at a cost of \$34.2 million, cost shared between the federal government and the City.

Affordable Housing

The City of St John's is investing millions of dollars in affordable housing in the Pleasantville area and in conjunction with the Government of Canada and Newfoundland and Labrador Housing has created 46 new units of housing. The City is also investing in our own housing portfolio by committing hundreds of thousands of dollars in capital upgrades, which will greatly improve the quality of life for our tenants. We are also working on plans to partner with private and other agencies to develop or make available land for new forms of housing.

PENSION LIABILITY

Unfunded liabilities in City sponsored pension plans are becoming a matter of increasing concern. Like all other pension plans, the City's pension funds have been adversely impacted by global economic conditions. Pension fund assets have lost value due to low interest rates and stock market decline. We are not alone, as virtually every pension plan in the country is grappling with the same issue. The unfunded liability in City pension plans is currently estimated at over \$100 million.

The issue with the City's pension programs has been recognized for some time and the City has been making annual special payments of \$3.2 million towards unfunded liabilities. However, recent actuarial valuations indicate that these special payments must increase to \$7.8 million in 2013, and increase further to almost \$10 million by 2014.

Pension Funding

	Unfunded Liability	Special Payments (millions of dollars)			
		2012	2013	2014	2015
City	\$73.2	\$2.4	\$7.0	\$7.0	\$7.0
Metrobus	\$30.6	\$0.8	\$0.8	\$2.9	\$2.9
Total	\$103.8	\$3.2	\$7.8	\$9.9	\$9.9

In the coming year, the City will focus on development of a long-term strategy to address the pension challenge. All options must be considered, including changes to benefit levels and how much the City and its employees contribute to the plans. The City will be looking for the cooperation of our employees and their unions in this undertaking. The first order of business will be an examination of the Councillors' Pension Plan, which we hope to complete by June 30, 2013.

LOOKING BEYOND 2013

The cost of operating the City is forecast to be \$274 million by 2015.

The forecasted expenditure of \$274 million for 2015 does include the maintenance costs for the City assuming responsibility for the Team Gushue Highway Extension. Upon completion, this major regional trunk road will be transferred from the province to the City. The City will own and maintain it at a cost of approximately \$1 million per year, without any support from surrounding municipalities, who will clearly benefit from this new road. If residents of Mount Pearl, Paradise, Conception Bay South and other surrounding communities expect to make it to work on time to their jobs in St. John's, more regional roads will be required in the future. The time has come to develop a regional transportation plan. The existing road network in and out of St. John's will not accommodate the traffic which will be generated by continued growth throughout the region. A deficient road network impacts the entire region, but will be especially difficult on those who commute to and from the City.

The City of St. John's is calling upon the provincial government and our municipal neighbours to begin dialogue towards development of a Regional Transportation Plan.

2012 Budget	2013 Budget	2014 Forecast	2015 Forecast
\$235,600,000	\$244,600,000	\$267,600,000	\$273,900,000

THREE-YEAR FORECAST

The City will continue its fiscally prudent approach to budgeting throughout the forecast period and efforts will be made to manage expenditures to below these forecast levels. There are, however, a number of factors which will contribute to expenditure growth:

- A number of major infrastructure projects, especially water treatment, have been undertaken in recent years. It is now time to refinance these investments. As a result, principle and interest payments on new infrastructure debt will increase by \$5.6 million in 2014.
- As noted earlier, Bay Bulls Big Pond DAF Plant, Petty Harbour-Long Pond Treatment Plant and Riverhead Wastewater Treatment Plant should all reach full operational status in 2013, but only operate for part of that year. A full year of operation is reflected in the 2014 and 2015 forecast.
- Also, as indicated earlier, special pension payments will increase by \$4.6 million in 2013, a further \$2.1 million in 2014 and will continue at this level in 2015.

These three factors alone combine to increase annual operating costs by almost \$23 million per year.

INFRASTRUCTURE PLAN

We must continually invest in infrastructure to support the delivery of essential public services. The primary focus in recent years has been water and wastewater treatment infrastructure. Approximately \$280 million in federal, provincial and municipal funds will have been invested by the time projects are completed in 2013.

With the City's new water and wastewater treatment infrastructure in place we now have first class facilities that will serve us well into the future. In upcoming years it is important that the City continue its investment into critical infrastructure and over the next three years projects within the City are estimated at well over \$200 million, including contributions from the federal and provincial governments.

Major infrastructure investments will include:

- \$60 million to expand the St. John's Convention Centre, which will position the City to attract larger conventions and other events. The entire region will benefit from this investment.
- \$32 million to construct a new Wedgewood Park Community Centre, which will provide citizens of all ages with a high quality indoor recreation venue. The City is also open to discussions with other municipalities on regional utilization of this new facility.

INFRASTRUCTURE PLAN

- \$35 million to replace aging water transmission mains, to improve the security of our water supply to residences and businesses.
- \$40 million towards street and sidewalk rehabilitation to relieve traffic congestion and enhance road safety for drivers, cyclists and pedestrians.
- \$15 million towards further development of parks, open spaces, trails and sports fields. This funding includes the revitalization of Bannerman Park and a new park for the Kenmount Terrace area.
- \$3 million for a new Southlands Community Centre, to provide that neighborhood with a venue for social and recreational events.
- \$5.7 million for the construction of a new west end fire station to enhance protection of residents and properties.
- \$5 million for affordable and supportive housing projects.
- \$15 million towards new buses for the public transit system.

The City looks forward to renewal of cost-sharing arrangements with both the federal and provincial governments, which will increase capital funding available for infrastructure, and allow us to add more projects to the list. We encourage both levels of government to create long-term, reliable programs that will allow municipalities to make strategic long-term plans to address infrastructure deficits.

INFRASTRUCTURE PLAN

The City must of course borrow to undertake capital projects, but we must be mindful not to over extend ourselves.

The City's debt service ratio in 2012 is approximately 11.48 per cent and is a key factor in maintaining our favourable credit rating. With the additional debt incurred to undertake new projects, minus the debt we will pay off, the City's debt service ratio by 2015 is forecast to remain in the 11 to 12 per cent range.

The City will continue to make prudent and strategic infrastructure investments while being mindful of the importance of maintaining our positive credit rating.

TAX REVENUE

Property and water taxes account for 85 per cent of the City's discretionary revenue.

	2012 Value	Percentage
Residential Property Tax	70,615,000	37.0
Business Property Tax	29,625,000	15.5
Business Occupancy Tax	25,550,000	13.4
Water Tax/Grants	37,700,000	19.8
Utility Tax	6,100,000	3.2
Federal PILT	2,000,000	1.0
Provincial MOG	3,411,000	1.8
Provincial Water Tax Grant	2,100,000	1.1
Parking Permits/Meters/Fines	3,750,000	2.0
Building Permits/Inspections	3,444,000	1.8
Recreation Program Fees	1,613,000	0.9
Other	4,828,000	2.5
Total	\$190,736,000	100%

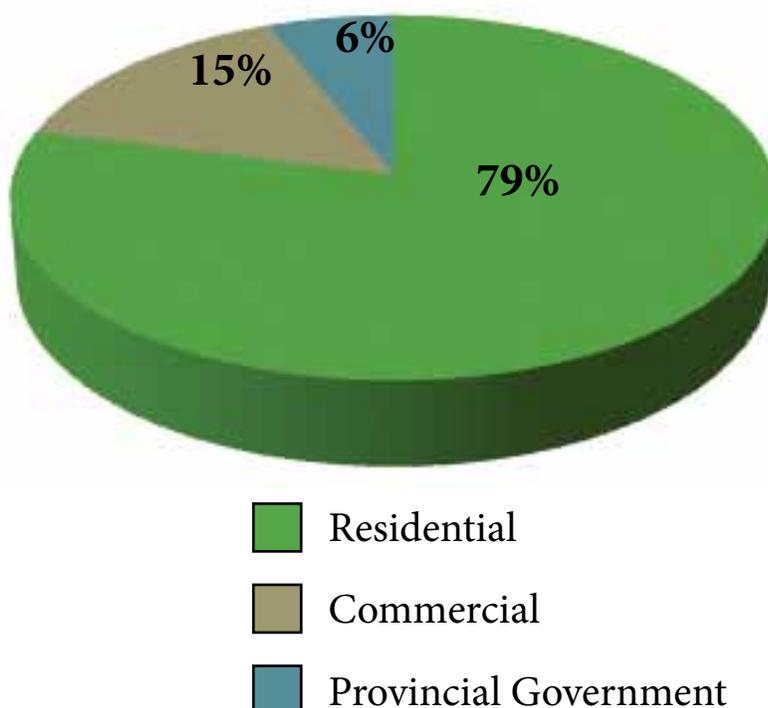

WATER TAX

Water tax is set at a level necessary to recover the full annual cost of water and wastewater treatment. These treatment costs are estimated at \$36.7 million for 2013, and forecasted to grow to \$42.6 million by 2015.

The capital and operating costs of new treatment facilities increase the supply and improve the quality of drinking water. However, while this undoubtedly increases costs, the safety and supply of our drinking water system is perhaps the most important function of a municipal government. And increased expenditure on water and wastewater treatment is well justified.

Water tax revenue must therefore increase by about \$1.5 million in 2013 to match expenditure growth.

Share of Water Tax

Residential consumption presently accounts for about 39 per cent of total water utilization, although residential users contribute 79 per cent of the total costs of providing water to the City.

The commercial-institutional sector, which includes the provincial government, consumes 61 per cent of the water produced, however they only contribute 21 per cent of the total costs.

WATER TAX

There is clearly a significant imbalance in the distribution of water tax burden between residential and business users. Council will start to correct this inequity in 2013:

- There will be no water tax increase for residential users in 2013. The Residential Water Tax rate will remain frozen at its 2012 level of \$615.
- The Commercial Water Tax rate will be increased from \$0.88 per cubic meter to \$1.32 per cubic meter. The Commercial Meter Rates will be reduced by 20 per cent. The net effect will be a 27 per cent increase in the Water Tax revenue collected from the commercial sector.

Further review will be undertaken in 2013 before residential and commercial water rates are set for 2014 and 2015.

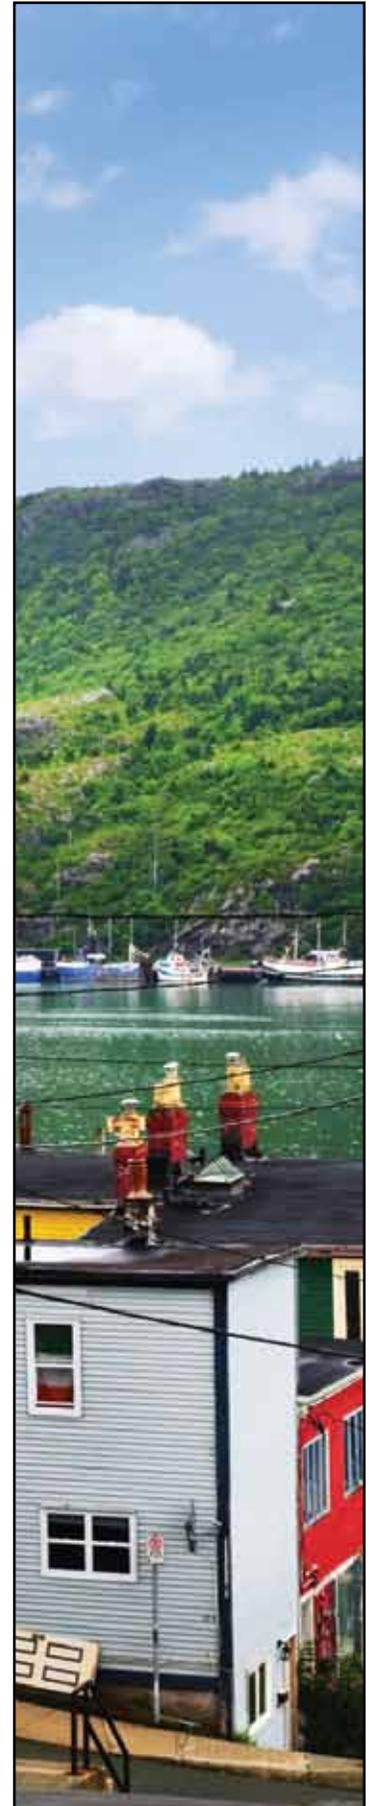

PROPERTY TAX

As a result of the property re-assessment process, the value of our residential property tax base has increased by 47 per cent, up to \$10 billion. The value of the commercial base has increased by 31 per cent, up to \$2.3 billion:

Assessed Values (billions of dollars)

	2010 Value	2013 Value	Increase
Residential	\$6.8	\$10	47%
Commercial	\$1.8	\$2.3	31%

The current tax rate on residential property is 10.6 mils, and the effective commercial tax rate is 31.4 mils. If these tax rates were to remain in effect, the City would collect more tax than is required to cover the cost of municipal services. In fact, at current tax rates with new property values we would collect about \$40 million more than we need for 2013 based on our projected expenditures.

PROPERTY TAX

The City has been vigilant in its efforts to restrict expenditure growth. We have been just as vigilant in keeping tax rates at reasonable levels. We will only tax at the level necessary to sustain our services. Therefore, effective January 1, 2013:

- The Residential Property Tax rate will be reduced from its existing level of 10.6 mils, to 8.1 mils.
- The Business Property Tax rate will be reduced from an effective level of 31.4 mils to 26.2 mils.

These tax rate reductions will have the effect of mitigating much of the impact of rising property values. For instance, if your property was valued at \$175,000, it is now probably valued at approximately \$259,000, an increase in value of approximately 48 per cent. Because of the reduction in mil rate, the actual property tax paid will increase from \$1,855 to \$2,103, an increase of \$248, or 13.4 per cent.

Please note that all properties did not increase in value by the same amount. There are many variables that affect a property's value. Some \$175,000 properties increased in value by more than 48 per cent and some by a lesser amount. The actual impact of these tax rate reductions will vary from property to property, based on changes in assessed value.

Average Taxpayer Increases

Property Value 2010	Property Value 2013	Increase	Tax Bill 2012	Tax Bill 2013	Increase
125,000	191,000	53%	\$1,325	\$1,550	\$225
175,000	259,000	48%	\$1,855	\$2,103	\$248
225,000	322,000	43%	\$2,385	\$2,611	\$226
275,000	381,000	38%	\$2,915	\$3,094	\$179
325,000	444,000	36%	\$3,445	\$3,603	\$158

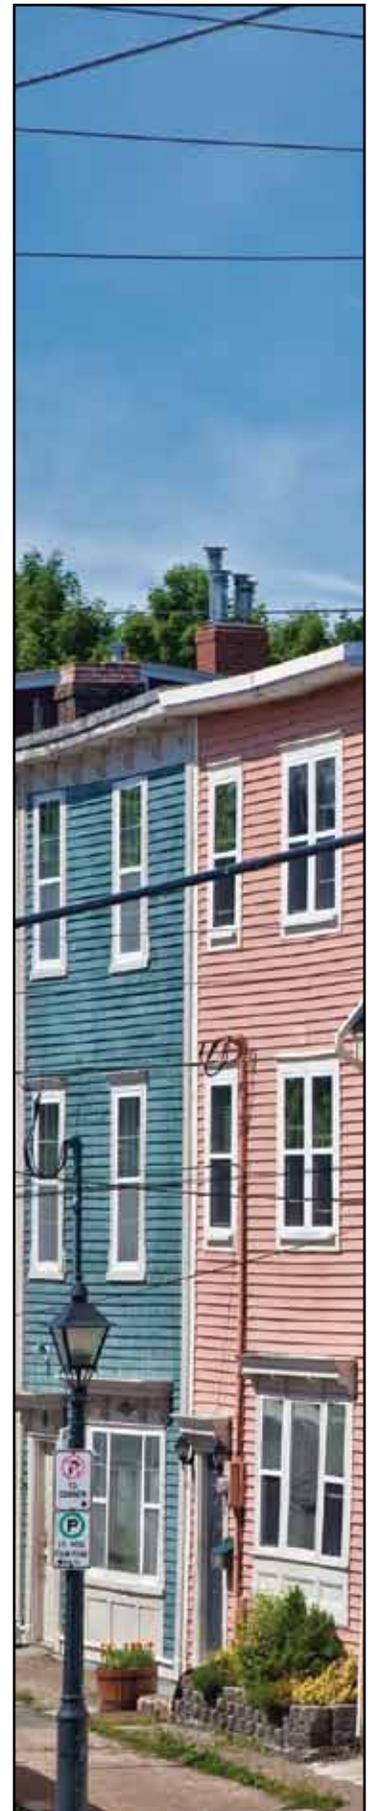

2014-15 REVENUE FORECAST

Based on the expenditure forecast for 2014 and 2015, property tax rates may have to be adjusted again in 2014 and 2015. The residential rate may increase to 8.78 mils in 2014, and then to 9.2 mils in 2015. Commercial rates are forecast to increase to 27.6 mils in 2014, and then to 28.4 mils in 2015.

These are forecasted rates which will be subject to confirmation, or adjustment, in the 2014 and 2015 budgetary processes. The final mil rate determination for those years could depend significantly on factors outside the exclusive control of the City:

- Should the provincial government ever agree to a new fiscal relationship which, among other things, would permit the City to collect property tax on provincial properties and relieve us of the obligation to pay HST, tax rates could be reduced.
- Should the federal and/or provincial governments not renew present infrastructure cost-sharing arrangements, tax rates could increase if the City must cover a larger share of capital costs.
- The status of municipal pension funds and the future direction of investment returns, benefit levels and contribution rates could have a positive or negative effect on tax rates.
- There are a whole range of other variables that could impact tax rates in a positive or negative fashion on a go-forward basis.

The City will continue to push for a new fiscal relationship with the province, as well as long-term reliable infrastructure programs from the federal and provincial governments. We also commit to managing those issues within our control to the best of our ability with the interests of our taxpayers always in mind.

OTHER REVENUE SOURCES

In terms of other sources of revenue, most are expected to remain relatively stable, or see moderate growth over the next three years.

- Accommodation Tax will increase from 3 to 4 per cent upon approval of the provincial government. Tax Revenue should increase from \$2.1 million to \$3.8 million by 2015. This revenue source will be used to pay for the St. John's Convention Centre and support the marketing initiatives of Destination St. John's.
- Utility Tax is forecast to grow from \$6.1 to \$7.4 million by 2015, with no change to the present 2.5 per cent tax rate.
- There will be several fee increases, as the City adjusts fee levels to be more reflective of the cost of providing services. A survey of other jurisdictions clearly indicates our fees are below those of other comparable Canadian cities. Perhaps most significant is an increase in the Development Fee from \$1,000 per residential lot to \$2,000. This fee will also be applicable to commercial developments. The current \$1,000 fee has been in effect since 2004. Development Fee revenue is 100 per cent dedicated towards growing and maintaining our network of parks, open spaces and playgrounds. Those costs have increased significantly since 2004, and there is a need to expand the network.

Additional fee revenue of approximately \$800,000 is expected from these fee increases.

Fee Increases		
	2012 Fee	2013 Fee
Development Fee	\$1,000	\$2,000
Application Fee	\$100	\$200
Rezoning Fee	\$100	\$500
Plan Amendment Fee	\$300	\$500
Street Excavation Permit	\$50	\$300

MUNICIPAL OPERATING GRANT

For budgetary purposes we are assuming that the City's Municipal Operating Grant will remain stable at \$3.4 million for the next three years.

The City will continue to press our provincial government for long overdue changes to the provincial-municipal fiscal relationship. Unfortunately, we have received no formal response to the proposals we advanced to the provincial government over a year ago. While we understand that the Honorable Minister of Municipal Affairs is considering changes to the Municipal Operating Grant formula, we have absolutely no idea what he has in mind, because we have not been consulted at this point.

CONCLUSION

The City has exercised best efforts in containing 2013 expenditure growth to a very modest 3.8 per cent. This has allowed us to significantly reduce both the residential and commercial property tax rates.

Unfortunately, the benefit of these tax rate reductions cannot be evenly distributed among all taxpayers. Property value is the foundation of our current municipal taxation system. Everyone's property is not increasing by the same value, and the impact of tax rate reductions will therefore vary. But, property tax is the City's primary source of revenue at this point and we unfortunately have no choice but to do it this way.

It is still our hope that the provincial government will seriously consider proposals which have been advanced by the City and Municipalities Newfoundland and Labrador for a new fiscal relationship. Tinkering with the existing municipal operating grant is simply not enough.

APPENDIX 1: REVENUE PROJECTION

	Approved Budget 2012	Projected for Fiscal 2012	Projected Budget 2013
Taxation:			
41112 Residential Realty	\$70,615,000	\$71,603,617	\$77,083,000
41121 Business Realty	\$29,625,000	\$29,556,247	\$51,829,000
